SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jan. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS ISSUED UNDER SECTION 1(d)

The following marks have registered on the Principal Register pursuant to the intent-to-use provisions of Section 1(d) of the Trademark Act of 1946, as amended.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1142 O.G. 66, on Sept. 29, 1992.

For use of the European Patent Office as an International Searching Authority for international applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52, on Sept. 28, 1982.

For use of the European Patent Office as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office, see the notices appearing in the *Official Gazette* at 1080 O.G. 2, on July 7, 1987 and at 1091 O.G. 2, on June 7, 1988. There is no longer a limit on the number of such international applications accepted for international preliminary examination by the European Patent Office; see the notice appearing at 1116 O.G. 32, on July 17, 1990.

The search fee of the European Patent Office was changed on Oct. 1, 1992, due to changes both in the amount of the international search fee charged by the European Patent Office and in the exchange rate of the U.S. dollar to the German mark, and was announced in the *Official Gazette* at 1142 O.G. 20, on Sept. 8, 1992.

International fees, effective on Dec. 1, 1992, due to changes in the exchange rate of the U.S. dollar with regard to the Swiss franc, were announced in the *Official Gazette* at 1143 O.G. 62, on Oct. 27, 1992.

Certain domestic PCT fees and charges for International Search and Preliminary Examination have been changed effective Oct. 1, 1992 and were announced in the *Official Gazette* at 1141 O.G. 68 on Aug. 25, 1992.

Acting Assistant Secretary and Acting Commissioner of Patents and Trademarks.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d) provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(h), as amended effective Dec. 16, 1991. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on December 19, 1989 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,887,315 through 4,888,824
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on December 17, 1985 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,558,466 through 4,559,645
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

For patents based on applications filed on or after December 12, 1980, but before August 27, 1982, patent owners must establish small entity status according to 37 CFR 1.27 if they have not done so and if they wish to pay the small entity.

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months and eleven years and six months are set forth in 37 CFR 1.20(e)-(g), as amended Oct. 1, 1992, which are reproduced below:

37 CFR § 1.20 Post-issuance fees

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after after Dec. 12, 1980 , in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§ 1.9f) $465.00
By other than a small entity $930.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§ 1.9f) $935.00
By other than a small entity $1,870.00

(g) For maintaining an original or reissue patent except a design or plant patent, based on an application filed on or after Dec. 12, 1980, in force beyond 12 years; the fee is due by eleven years and six months after the original grant:

By a small entity(§ 1.9(f)) $1,410.00
By other than a small entity $2,820.00

The amounts of the surcharges for paying the maintenance fee during the grace period or after the expiration of the patent are set forth in 37 CFR 1.20(h), and (i), which are reproduced below:

(h) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months , seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980

By a small entity (§ 1.9f) $65.00
By other than a small entity $130.00

(i) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable $620.00

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Notice of Expiration of Trademark Registrations Due to Failure to Renew

15 U.S.C. 1059 provides that each trademark registration may be renewed for periods of ten years from the end of the expiring period upon payment of the prescribed fee and the filing of an acceptable application for renewal. This may be done at any time within six months before the expiration of the period for which the registration was issued or renewed, or it may be done within three months after such expiration on payment of an additional fee.

According to the records of the Office, the trademark registrations listed below are expired due to failure to renew in accordance with 15 U.S.C. 1059.

Extension of Existing Interim Orders Granting Protection under the Semiconductor Chip Protection Act of 1984 for Nationals, Domiciliaries and Sovereign Authorities of Certain Countries to Which Interim Protection Has Been Extended
[Docket No. 921111-2311]

Agency: Patent and Trademark Office, Commerce
Action: Notice
Summary: Pursuant to section 914 of the Semiconductor Chip Protection Act of 1984 (SCPA), 17 U.S.C. 914, and the guidelines issued by the Patent and Trademark Office, 49 FR 44517 (Nov. 7, 1984), the Acting Assistant Secretary and Acting Commissioner of Patents and Trademarks has determined that existing interim orders should be extended in duration for nationals, domiciliaries and sovereign authorities of Japan, Sweden, Australia, the Member States of the European Community, Canada, Switzerland, Finland, and Austria under section 914 of the SCPA.
Effective Date: This order is effective on Nov. 5, 1992.
Termination Date: This order will terminate on July 1, 1994.
Addresses: Address correspondence to Assistant Commissioner for External Affairs, United States Patent and Trademark Office, Box 4, Washington, D.C. 20231.
For Further Information Contact: Michael K. Kirk, Assistant Commissioner for External Affairs, United States Patent and Trademark Office, Box 4, Washington, D.C. 20231, phone (703) 305-9300.
Supplementary Information: When Congress enacted the Semiconductor Chip Protection Act of 1984 (SCPA) it established an entirely new category of intellectual property that did not fall under the Paris Convention for the Protection of Industrial Property, the Universal Copyright Convention or the Berne Convention for the Protection of Literary and Artistic Works. The Congress created a balanced intellectual property regime for the protection of layout-designs of semiconductor chips that provided a level of protection that was satisfactory to meet the needs of the U.S. public and the domestic semiconductor chip industry. At the same time, Congress was also aware of the need of U.S. chip producers for protection in foreign markets, of the need of foreign chip producers for protection here in the United States and that there was no international treaty for the protection of chips. Faced with this dilemma, Congress created an innovative mechanism to encourage the rapid building of a worldwide consensus on an appropriate regime of intellectual property protection for chip layout-designs that would be compatible with U.S. law and would encourage the development of the international market for semiconductor chip products. To achieve these goals, Congress established a two-tiered system for protecting foreign works in the United States. Section 914 of the SCPA permits the Secretary of Commerce to extend interim access to protection under the SCPA for foreign chip creators if certain criteria are met, and section 902 permits the President to proclaim indefinite access to protection under the SCPA for foreign creators from countries that protect U.S. works. This system has laid the groundwork for establishing a technology-specific, carefully-tailored and balanced regime of mask work protection in other chip-producing countries.

Section 902 of the SCPA sets out the criteria under which foreign works are eligible for protection in the United States. Section 902(a)(1) provides that:

> Subject to the provisions of subsection (b), a mask work fixed in a semiconductor chip product, by or under the authority of the owner if the mask work, is eligible for protection under this chapter if—
>
> (A) on the date on which the mask work is registered under section 908, or is first commercially exploited anywhere in the world, whichever occurs first, the owner of the mask work is (i) a national or domiciliary of the United States, (ii) a national, domiciliary or sovereign authority of a foreign nation that is a party to a treaty affording protection to mask works to which the United States is also a party, or (iii) a stateless person wherever that person may be domiciled;
>
> (B) the mask work is first commercially exploited in the United States; or
>
> (C) the mask work comes within the scope of a Presidential proclamation issued under paragraph (2).

Section 902(a)(2) sets out the statutory criteria against which foreign laws are to be evaluated before issuing a Presidential proclamation. It provides that:

> Whenever the President finds that a foreign nation extends, to mask works of owners who are nationals or domiciliaries of the United States protection (A) on substantially the same basis as that on which the foreign nation extends protection to mask works of its own nationals and domiciliaries and mask works first commercially exploited in that nation, or (B) on substantially the same basis as provided in this chapter, the President may by proclamation extend protection under this chapter to mask works (i) of owners who are, on the date on which the mask works are registered under section 908, or the date on which the mask works are first commercially exploited anywhere in the world, whichever occurs first, nationals, domiciliaries, or sovereign authorities of that nation, or (ii) which are first commercially exploited in that nation.

In 1987 the Chairman of the then House Subcommittee on Courts, Civil Liberties and the Administration of Justice noted that the transition provisions in section 914 of the SCPA were "intended to encourage the rapid development of a new worldwide regime for the protection of semiconductor chips." 133

Cong. Rec. E1283 (daily ed. Apr. 6, 1987). These transitional provisions empowered the Executive to use the issuance of interim protection orders under section 914 of the SCPA as a means to encourage other nations to move speedily to establish substantially similar systems of protection. These provisions originally were set to expire three years after the date of the enactment of the SCPA, Nov. 7, 1987.

The Congress has twice extended the authority to issue interim orders in the belief that this process is promoting the protection of U.S. mask works abroad and that the speedy enactment of laws in other countries that are patterned after U.S. law is progress. H.R. Rep. 100-388, 100th Cong., 1st Sess. (1987). Under the SCPA, the Assistant Secretary and Commissioner of Patents and Trademarks has been delegated the tasks of determining when and under what conditions foreign mask works will be eligible for interim protection. To become eligible, a foreign government must demonstrate that it is making good faith efforts toward establishing a regime of protection in its territory that is substantially similar to that which is provided in the United States under the SCPA.

The countries to which interim protection has been extended (the Member States of the European Community, Australia, Austria, Canada, Finland, Japan, Sweden, and Switzerland) cooperated with the United States to try to establish a treaty for the adequate and effective protection of mask works in the World Intellectual Property Organization (WIPO). A Diplomatic Conference for the negotiation of a Treaty on the Protection of the Layout-Designs of Integrated Circuits was held in Washington during the month of May 1989. The Treaty adopted at the conclusion of the Conference did not meet the needs of either Japan or the United States. No developed country has signed the Treaty, and it is yet to come into force.

Subsequent to the Diplomatic Conference, the United States has continued to work to conclude a multilateral agreement for the adequate and effective protection of semiconductor integrated circuit layout-designs. The Dec. 20, 1991, text on the Trade Related Aspects of Intellectual Property (TRIPS) in the Uruguay Round of Trade negotiations in the General Agreement on Tariffs and Trade contains a section that will require such protection. It builds upon the substantive provisions of the WIPO Treaty and adds the missing features deemed necessary to provide an adequate level of protection. The countries to which interim protection has been extended all worked closely with the United States to achieve this goal. However, the TRIPS Agreement has not yet been concluded, and the presently issued interim orders will expire on Dec. 31, 1992, before the TRIPS Agreement could possibly come into force.

The combination of the standards set out in section 902 and the process established to implement section 914 clearly appear to have satisfied the Congressional intent behind this unprecedented process. In 1984, only the United States had specific legislation in place for the protection of chips, while today such protection is in place in all of the countries to which interim protection has been extended. U.S. semiconductor chip layout-designs enjoy protection in all of those countries today. In some, the protection is enjoyed on the basis of national treatment and in some on the basis of reciprocity.

Since the interim orders were last extended, no complaints about the adequacy of the mask work protection laws in any of the countries to which interim protection has been extended have been received. Should such complaints arise in the future, they can be taken into account in determining whether a particular interim order should be rescinded prior to its scheduled termination.

Because of this favorable environment, and in order to ensure the continuing protection of U.S. layout-designs in foreign markets, I have determined that extending the present interim orders will continue the incentive to work toward a successful conclusion of the TRIPS Agreement or another international agreement which will provide the basis for an adequate and effective multinational system for the protection for semiconductor mask works. In light of this, I am extending the interim orders for Japan, Sweden, Australia, the Member States of the European Community, Canada, Switzerland, Finland and Austria under Section 914 of the SCPA. These orders will expire on July 1, 1994.

Changes in Practice Relating to Filing Patent Applications

Agency: Patent and Trademark Office, Commerce.
Action: Final Rule.
Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases to provide a uniform practice with respect to filing an oath or declaration and filing fees in continuing applications.
Effective Date: Jan. 4, 1993. These rules will be applicable to all papers and applications filed with the Office on or after the effective date.
For Further Information Contact: Jeffrey V. Nase by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231.
Supplementary Information: In a Notice of Proposed Rulemaking published in the *Federal Register* (57 FR 31344) on July 15, 1992, and in the Patent and Trademark Office *Official Gazette* (1141 Off. Gaz. Pat. Office 9) on Aug. 4, 1992, the Office proposed to amend § 1.60. The due date for submitting written comments was extended to Sept. 10, 1992, in an Extension of Comment Period published in the *Federal Register* (57 FR 38640) on Aug. 26, 1992.

One comment was received. The comment favored adoption of the proposed rule changes.

A continuation or divisional application filed under § 1.60 did not receive a filing date until a complete copy of the prior application was filed, including a true copy of the oath or declaration. Since the Office is in possession of the oath or declaration of the prior application, § 1.60 is being modified to be consistent with §§ 1.53 and 1.62 by permitting filing of a true copy of the oath or declaration within a time specified in a notice of missing parts mailed by the Office.

The specific revisions are discussed below:

(1) Correction of inventorship (§ 1.48)

Section 1.48(a) is amended to replace the designation by letter of various requirements therein with numbered designations so as to avoid confusion when making reference to this section.

(2) Procedures for completing applications filed under § 1.60

Section 1.60 outlines one of the procedures that may be followed by applicants to file a continuation or divisional application. One of the requirements under this section is that applicants file a true copy of the complete parent application as filed, including the oath or declaration. Paragraph (c) of this section had specified that a filing date would not be granted if applicant failed to file a complete application under this section. When the missing item was filed, a filing date was granted as of the date of receipt of the missing item. Practice under § 1.60 is being modified to be similar to the procedures for filing continuing applications under § 1.53(d) and continuation-in-part applications under § 1.62. More specifically, a new paragraph (d) is added in § 1.60 to indicate that if an application filed pursuant to § 1.60(b) is otherwise complete, but does not include the appropriate filing fee or a true copy of the oath or declaration from the prior complete application, a filing date will be granted. The copy of the oath or declaration, as well as payment of the appropriate filing fee must be submitted within a time period specified in a notice of missing parts mailed by the Office. In a manner similar to the practice under §§ 1.53(d) and 1.62(d), the appropriate oath or declaration and/or filing fee as well as the surcharge set forth in § 1.16(e) must be filed within the time period specified in the notice of missing parts in order to avoid abandonment of the application. Paragraphs (b) and (c) of this section are amended to make reference to the exception specified in paragraph (d) discussed above.

OTHER CONSIDERATIONS

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these rule changes will not have a significant economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these changes is to accord a filing date to certain continuing applications which, through oversight, fail to include certain papers which can be submitted after the filing date.

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers; individuals; industries; Federal, state or local government agencies; or geographic regions because most of the changes reduce procedural burdens. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no record keeping or reporting requirements within the coverage of the Act are placed upon the public.

List of Subjects
37 CFR Part 1

Administrative practice and procedure, Freedom of information, Inventions and patents, Reporting and record keeping requirements.

For the reasons set out in the preamble, and pursuant to the authority contained in 35 U.S.C. 6, part 1 of title 37 of the Code of Federal Regulations is amended as set forth below.

PART 1 - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:
Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.48, paragraph (a) is revised to read as follows:

§ 1.48 Correction of inventorship

(a) If the correct inventor or inventors are not named in an application for patent through error without any deceptive intention on the part of the actual inventor or inventors, the application may be amended to name only the actual inventor or inventors. Such amendment must be diligently made and must be accompanied by:

(1) a petition including a statement of facts verified by the original named inventor or inventors establishing when the error without deceptive intention was discovered and how it occurred;

(2) an oath or declaration by each actual inventor or inventors as required by § 1.63;

(3) the fee set forth in § 1.17(h); and

(4) the written consent of any assignee.

When the application is involved in an interference, the petition shall comply with the requirements of this section and shall be accompanied by a motion under § 1.634.

*****

3. In Section 1.60, paragraphs (b) and (c) are revised and paragraph (d) is added to read as follows:

§ 1.60 Continuation or divisional application for invention disclosed in a prior application.

*****

(b) An applicant may omit signing of the oath or declaration in a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 and 121 and § 1.78(a)) if:

(1) the prior application was a complete application as set forth in § 1.51(a),

(2) applicant indicates that the application is being filed pursuant to this section and files a true copy of the prior complete application as filed including the specification (with claims), drawings, oath or declaration showing the signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application,

(3) the inventors named in the continuation or divisional application are the same or less than all the inventors named in the prior application, and

(4) the application is filed before the patenting or abandonment of or termination of proceedings on the prior application.

The copy of the prior application must be accompanied by a statement that the application papers filed are a true copy of the prior application and that no amendments referred to in the oath or declaration filed to complete the prior application introduced new matter therein. Such statement must be by the applicant or applicant's attorney or agent and must be a verified statement if made by a person not registered to practice before the Patent and trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (1.78(a)) will be entered before calculating the filing fee and granted the filing date. If the continuation or divisional application is filed by less than all the inventors named in the prior application, a statement must accompany the application when filed requesting deletion of the names of the person or persons who are not inventors of the invention being claimed in the continuation or divisional application. Except as provided in paragraph (d) of this section, if a true copy of the prior application as filed is not filed with the application or if the statement that the application papers are a true copy is omitted, the application will not be given a filing date earlier than the date upon which the copy and statement are filed, unless a petition with the fee set forth in § 1.17(i)(1) is filed which satisfactorily explains the delay in filing these items.

(c) if an application filed pursuant to paragraph (b) of this section is incomplete for reasons other than those specified in paragraph (d) of this section, applicant will be notified and given a time period within which to complete the application in order to obtain a filing date as of the date of filing the omitted item provided the omitted item is filed before the patenting or abandonment of or termination or proceedings on the prior application. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n)

(d) If an application filed pursuant to paragraph (b) of this section is otherwise complete, but does not include the appropriate filing fee or a true copy of the oath or declaration from the prior complete application, showing the signature or an indication it was signed, a filing date will be granted and applicant will be so notified and given a period of time within which to file the fee, or the true copy of the oath or declaration and to pay the surcharge as set forth in § 1.16(e) in order to prevent abandonment of the application. The notification pursuant to this paragraph may be made simultaneously with any notification pursuant to paragraph (c) of this section.

Electronic Filing of Patent and Trademark Applications

Agency: Patent and Trademark Office Commerce
Action: Advance Notice of Proposed Rulemaking

Summary: This advance notice of proposed rulemaking is to inform the public that the Patent and Trademark office (PTO) is considering amending its rules of practice: (1) to allow for electronic filing of patent applications and trademark applications; and (2) to require applications filed in paper form to follow a prescribed order and format.

The PTO anticipates that permitting electronic filing of applications will improve the accuracy of the information relied upon in the examination of patent and trademark applications, eliminate delays caused by mailing and data entry, and, as a first step toward a fully-automated processing system, ultimately provide considerable cost savings. The cost savings realized could be used to help reduce the need for future fee adjustments and/or fund improvements in the delivery of services. Requiring applications filed on paper to follow a prescribed order and format will enable the PTO to convert these applications to electronic format.

The purposes of this notice are to: (1) invite interested parties to participate in pilot programs involving electronic filing of patent and trademark applications; and (2) encourage comments on this topic, in the form of responses to the questions posed in this notice, from industry, the patent and trademark bars, and members of the public

Dates: Comments should be received on or before Feb. 28, 1993.

Addresses: Written comments should be addressed, if sent by mail, to the attention of Edward R. Kazenske, Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, c/o Commissioner of Patents and Trademarks, Washington, D.C. 20231. If delivered by hand, comments should be brought to the Office of the Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, Room 906, Crystal Park 2, 2121 Crystal Drive, Arlington, Va.

For Further Information Contact: Edward R. Kazenske, Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, (703) 305-8600.

SUPPLEMENTARY INFORMATION:

1. Pilot Programs

Currently, the PTO accepts patent and trademark applications delivered by mail or in person. These applications are in paper form or, in the case of patent applications for nucleotide sequences, a combination of computer-readable (see 37 CFR 1.821-1.825) and paper form.

The PTO is initiating a pilot program that would permit electronic filing of patent and trademark applications, using software now under consideration by the PTO. Initially, it is anticipated that participants in the pilot program would be required to use the PTO software to create a diskette, which would then be mailed to the PTO along with the paper application generated by the diskette. The diskette would serve the limited function of eliminating the initial data entry of applications into the PTO databases.

As part of a second pilot program, a separate group of participants is being solicited to file paper applications following a prescribed order and format. The paper applications would then be scanned and converted to electronic format. Data collected from the pilot programs will be evaluated to determine whether requiring submission of a paper application in a certain order and format facilitates data entry; whether any modifications to the electronic filing software are required; and more fundamentally, whether electronic filing is a feasible, cost-effective alternative to filing in paper form.

2. Paper Applications

The PTO contemplates that paper applications will be required to follow the order and format of the data elements (e.g., inventor, foreign priority information, in the case of a patent application; applicant, mark, in the case of a trademark application) entered in the electronic filing system. This would enable the PTO to scan and convert paper applications to electronic applications upon receipt at the PTO. Once the paper application is converted into electronic form, processing of the application will be done in a purely electronic format. The electronic form of the application would become the official file.

3. Electronic Filing

The PTO contemplates that applicants filing by electronic means would be required to use an "Authoring Program" developed by the PTO, which will be available to facilitate the preparation of an electronic submission and record the submission on electronic media. This "Authoring Program" will include a validation feature so that applicants, themselves, can test whether an electronic submission complies with all requirements.

The "Authoring Program" software under consideration by the PTO will be designed to be compatible with computers capable of creating files of standard ASCII (American Standard Code for Information interchange) text within one or more of the major operating systems environments (e.g., DOS, Windows®, Unix®, and Apple Macintosh®).

The format for text in patent applications will specify a set of mandatory data elements, similar to those required under the Patent Cooperation Treaty. The format for text in trademark applications will specify a set of mandatory data elements, similar to those required of a "written application" under 15 U.S.C. 1051. In both the patent and trademark software, specific formats will be required for non-textual elements, such as drawings, formulas, tables and specimens. These non-textual elements would be submitted in separate computer files called "Presentations," similar to the presentation of nucleotide sequence information in accordance with 37 CFR 1.821-1.825.

The PTO also contemplates that certain individuals be designated by the agency as qualified "electronic application transmitters." Upon application to the PTO, unlimited parties meeting specified requirements may be issued Personal Identification Numbers to enable them to transmit applications in electronic form on behalf of themselves or other individuals.

In an effort to facilitate public comment to the questions set forth below, the following background information is provided:

4. Background Specific to Electronic Patent Applications

Signature

Under 35 U.S.C. 111, a patent application must include an oath by the applicant. 35 U.S.C. 25 permits a declaration in lieu of oath. The applicant's signed oath or declaration is not required for receipt of a filing date, but may be submitted, upon payment of a surcharge, within a prescribed period.

Certified Copy of Foreign Patent Application

Under 35 U.S.C. 119, a U.S. patent application may be based on a foreign patent application, thus, potentially, conferring the benefit of the earlier foreign patent application's filing date. A certified copy of the foreign patent application is required to be filed in the PTO before the patent is granted.

5. Background Specific to Electronic trademark Applications

Signature

Under 15 U.S.C. 1051, a trademark application must be verified by the applicant. Prior to implementation of the Trademark Law Revision Act of 1988 (TLRA) on Nov. 16, 1989, the PTO permitted verification of the application to be provided at any time during the examination process. With implementation of the TLRA, the PTO amended its regulations with respect to the verification of an application. 37 CFR 2.21, which sets forth the minimum requirements for an application to receive a filing date, was amended to require that the application be signed by the applicant at the time of filing.

Specimen

Under 15 U.S.C. 1051, a trademark application based on "use in commerce" must include specimens or facsimiles of the mark as used. 37 CFR 2.21(a)(5) requires at least one specimen or facsimile to be included with the "use" application in order to receive a filing date. Applications filed based upon a "bona fide" intention to use the mark in commerce, under 15 U.S.C. 1051(b), must be supplemented with specimens or facsimiles before the

registration issues. In order to meet the minimum requirements for filing an amendment to allege use or statement of use, one specimen or facsimile must be submitted. 37 CFR 2.76(e)(2) and 2.88(e)(2).

Certification or Certified Copy of Foreign Registration

Under 15 U.S.C. 1126(e), "an application [based on a foreign registration] shall be accompanied by a certification or a certified copy of the registration of the country of origin of the applicant." 37 CFR 2.21(a)(5) requires the certification or certified copy to be included with the application in order to receive a filing date.

6. Comments on the following Questions and Any Other Related Matters Are Solicited

Questions Common to Patent and Trademark Applications

a. What benefits do you foresee for the applicant if electronic filing is adopted? What disadvantages do you foresee?
b. Should the PTO require paper applications to be filed in a specific order and format to facilitate conversion to electronic format? What advantages and disadvantages do you foresee?
c. Should the electronic file become the official agency file?
d. Should electronic filing be expanded to encompass amendments and other submissions to the PTO?
e. Should paper or electronic application filings receive a filing date only if they meet order and format requirements, or should compliance be subject to a surcharge?
f. Should the PTO accept electronic filing by diskette, on-line, or both?
g. Should applications filed in paper form be converted to electronic form by the PTO? Should the PTO charge a fee for this service?
h. If paper applications are converted to electronic form by the PTO, should the PTO destroy or retain the paper applications?
i. Should fees be processed electronically?
j. Should the PTO create a registry of "electronic application transmitters" capable of transmitting patent and trademark applications for others? If so, what, if any, criteria should be established before one could be "registered"as an electronic application transmitter?"

Questions Related Solely to Patent Issues

k. Should the PTO require the oath or declaration to an electronically filed patent application be filed on paper to authenticate that applicants believe themselves to be original and first inventors of the subject matter of the electronically filed application?

If not, how should the filing of the oath or declaration be accomplished?

l. How should the filing of certified copies of foreign patent applications be accomplished for an electronically filed patent application?

Questions Related Solely to Trademark Issues

m. Should the PTO require electronically filed applications to include a scanned, signed declaration in order to receive a filing date? Should the PTO accept declarations in electronic form with some type of electronic signature?

If not, should 37 CFR 2.21 be amended to permit unverified applications to be accorded a filing date? if so, within what time period must an unverified application be ratified by the submission of a signed declaration?

How long should the PTO retain the signed declaration after it has been scanned and merged into the electronic file?

n. Should "use" applications submitted without a specimen be given a filing date?

If so, within what time period after filing must the specimens be submitted?

Should the number of required specimens be reduced?

How long should the PTO keep the specimens after they are scanned and merged into the electronic file?

o. Should Section 44(e) of the Trademark Act (15 U.S.C 1126(e)) be amended to permit applicants to submit a facsimile of the certification or certified copy of the foreign registration?

Alternatively, should the statute be amended to permit Section 44(e) applicants to obtain a filing date absent a certification or certified copy of the foreign registration? If so, within what time period must a Section 44(e) application be supplemented with a certificate or certified copy of the foreign registration?

How long should the PTO retain the certification or certified copy after it has been scanned and merged into the electronic application?

7. Candidates for the Pilot Programs

Any person interested in participating in one of the pilot programs identified above is requested to contact Edward R. Kazenske, Executive Assistant to the Commissioner and Director of Interdisciplinary Programs, c/o Commissioner of Patents and Trademarks, Washington, D.C. 20231. if delivered by hand, written statements of interest should be brought to Suite 906, Crystal park 2, 2121 Crystal Drive, Arlington, Va. 22202. Telephone: (703) 305-8600. Please indicate which pilot program you wish to participate in and please be certain to include a telephone number where you may be reached.

Disclaimers

4,836,485—*Gershon Cooper*, Encino, Calif.. UNIVERSALLY ADJUSTABLE MOUNTING DEVICE. Patent dated June 6, 1989. Disclaimer filed Aug. 7, 1992, by the assignee, Alliance Research Corp.

Hereby enters this disclaimer to the remaining term of said patent.

5,140,746—*Christian A. M. Debbaut*, Cary N.C.; METHOD AND DEVICE FOR MAKING ELECTRICAL CONNECTOR. Patent dated Aug. 25, 1992. Disclaimer filed Aug. 25, 1992, by the assignee, Raychem Corp.

The term of this patent subsequent to July 15, 2003 has been disclaimed.

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Box _____
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Box 3	Mail for the Office of Personnel for NFC
Box 4	Mail for the Assistant Commissioner for External Affairs and the Office of Legislation and International Affairs.
Box 5	"No Fee" mail related to trademarks.
Box 6	Mail for the Office of Procurement
Box 7	Reissue applications for patents involved in litigation and subsequently filed related papers.
Box 8	All papers for the Office of the Solicitor *except* communications relating to *pending litigation*; papers relating to pending litigation shall be mailed only to Office of the Solicitor, P.O. Box 15667, Arlington, Va. 22215
Box 9	Coupon orders for U.S. patent and trademark copies.
Box 10	Orders for certified copies of PTO documents except: trademark registrations and assignments.
Box 11	Electronic Ordering Service (EOS).
Box 12	Contributions to the Examiner Education Program.
Box 13	Mail for the Employee and Labor Relations Division.
Box 14	Invoices directed to the Office of Finance.
Box 15	Mail for the Advisory Commission on Patent Law Reform.
Box 16	Deposit Account Replenishment Checks
Box 171	Vacancy Announcement Applications.
Box AF	Expedited procedure for processing amendments and other responses after final rejection.
Box DAC	Petitions to revive, petitions to accept late payment of fees, petitions to defer issue, and petitions to withdraw an application from issue.
Box Assignment	All assignment documents except those filed with new applications.
Box DD	Mail related to Disclosure Documents.
Box EEO	Mail for the Office of Equal Employment Programs.
Box FWC	Requests for File Wrapper Continuation Applications (under 37 CFR 1.62)
Box Interference	Communications relating to interferences and applications and patents involved in interference.
Box Issue Fee	All Communications following the receipt of a PTOL-85. "Notice of Allowance and Issue Fee Due," and prior to the issuance of a patent should be addressed to Box Issue Fee, unless advised to the contrary. Assignments should be submitted in a separate envelope and not be sent to Box Issue Fee.
Box ITU	All intent to use documents, excluding the initial application and amendments to allege use.
Box M. Fee	Correspondence related to a patent that is subject to the payment of a maintenance fee.
Box Non-Fee-Amendment	Non-fee amendments to patent applications. (Use Box AF for responses after final rejection).
Box OED	Mail for the Office of Enrollment and Discipline
Box PATENT APPLICATION	New patent application and associated papers and fees.
Box TRADEMARK	New trademark application and associated papers and APPLICATION fees.
Box Pat. Ext.	Applications for patent term extension.
Box PCT	Mail related to applications filed under the Patent Cooperation Treaty.
Box Reexam	Requests for Reexamination for *original* request papers *only*.
Box Sequence	Submission of diskette for biotechnical application.
Box SN	For fee and petitions under 37 CFR 1.182 to obtain date received and/or serial number for patent applications *prior* to the Office's standard notification (return postcard or the official "Filing Receipt," "Notice to File Missing Parts," or "Notice of Incomplete Application").
Box Reconstruction	Correspondence pertaining to the reconstruction of lost patent files.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

REEXAMINATIONS

DECEMBER 22, 1992

Matter enclosed in heavy brackets [ ] appears in the patent but forms no part of this reexamination specification; matter printed in italics indicates additions made by reexamination.

B1 4,261,880 (1883rd)
POLYOLEFIN RESIN COMPOSITIONS

Masaki Fujii, Yokkaichi, and Akiyoshi Onishi, Tsu, both of Japan, assignors to Mitsubishi Petrochemical Company Limited, Tokyo, Japan

Reexamination Request No. 90/001,927, Jan. 30, 1990.
Reexamination Certificate for Patent No. 4,261,880, issued Apr. 14, 1981, Ser. No. 963,346, Nov. 24, 1978.
Claims priority, application Japan, Nov. 25, 1977, 52-141235
Int. Cl.[5] C08K *5/49, 5/52*
U.S. Cl. 524—147

AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

The patentability of claims 7–10, 12, 14 and 15 is confirmed.

Claims 1–6, 11, 13 and 16 having been finally determined to be unpatentable, are cancelled.

7. The polyolefin resin composition as set forth in claim 1, 2 or 3, in which the organic phosphorus compound is one having said formula $(R^2O)_2—P—O—L—O—P(OR^2)_2$ and is selected from the group consisting of tetraphenyldipropyleneglycoldiphosphite, 1,1-bis{3-t-butyl-4-[bis(tridecyloxy)phosphinooxy]-6-methylphenyl}butane, and mixtures thereof.

ALLYL AMINE MAO INHIBITORS

Philippe Bey, Strasbourg, France, assignor to Merrell Toraude et Compagnie, Strasbourg, France

Reexamination Request No. 90/002,411, Aug. 20, 1991.
Reexamination Certificate for Patent No. 4,454,158, issued Jun. 12, 1984, Ser. No. 268,555, Jun. 1, 1981.
Int. Cl.[5] A01N *33/02*
U.S. Cl. 514—649

AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

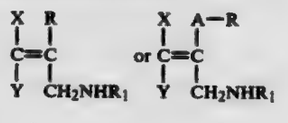
The patentability of claims 52–65, 66, 67 and 68 is confirmed.

Claims 14, 15, 42 and 43 are cancelled.

Claims 1, 4, 13, 16, 32, 41, 44, 45 are determined to be patentable as amended.

Claims 2, 3, 5–12, 17–31, 33–40, 46–51, dependent on an amended claim, are determined to be patentable.

1. A compound of the formula:



I II

wherein:

(a) X is fluorine and Y is hydrogen,

(b) Y is fluorine and X is hydrogen, or

(c) X is fluorine and Y is fluorine;

R is phenyl; phenyl monosubstituted, disubstituted, or trisubstituted by C_1–C_8alkyl, C_1–C_8alkoxy, hydroxy, chlorine, bromine, iodine, fluorine, trifluoromethyl, [nitro, C_1–C_6alkylcarbonyl, benzoyl,] or phenyl; 1- or 2-naphthyl; [1-, 2-, or 3-indenyl; 1-, 2-, or 9-fluorenyl; 1-, 2-, or 3-piperidinyl; 2- or 3-pyrrolyl; 2- or 3-thienyl; 2- or 3-furanyl; 2- or 3-indolyl; 2- or 3-thianaphthenyl; or 2- or 3-benzofuranyl;]

R_1 is hydrogen[,] *or* C_1–C_8alkyl[, benzyl, or phenethyl]; and

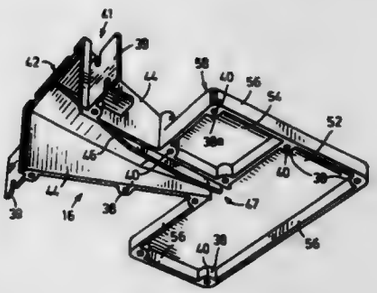
A is a divalent radical of the formula:

wherein R_2 is hydrogen, methyl, or ethyl, and m and n, independently, are an integer from 0 to 4, provided that m+n cannot be greater than 4; $—(CH_2)_p—D—(CH_2)_q—$, wherein D is oxygen or sulfur, p is an integer from 2 to 4, and q is an integer from 0 to 2, provided that p+q cannot be greater than 4; or $—(CH_2)_rCH=CH(CH_2)_s—$, wherein r is an integer from 1 to 3 and s is an integer from 0 to 2, provided that r+s cannot be greater than 3; or a non-toxic, pharmaceutically acceptable acid addition salt thereof.

B1 4,571,593 (1885th)
HORN ANTENNA AND MIXER CONSTRUCTION FOR MICROWAVE RADAR DETECTORS

Glen D. Martinson, Oakville, Canada, assignor to B.E.L.-Tronics Limited, Mississauga, Canada

Reexamination Request No. 90/002,683, Mar. 19, 1992.
Reexamination Certificate for Patent No. 4,571,593, issued Feb. 18, 1986, Ser. No. 606,895, May 3, 1984.
Int. Cl.[5] H01Q *13/02*
U.S. Cl. 343—783



AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

The patentability of claims 1–14 is confirmed.

1. A horn antenna construction for use in microwave detection circuits, comprising:

a substantially rigid and planar mounting board having upper and lower surfaces;

a microstrip board on the upper surface of said mounting board, having at least one mixing diode and a feed strip therefor, where the feed strip is located at or near a first edge of the microstrip board and on the upper, exposed side thereof;

and a one-piece molded horn element having an open bottom, an upwardly flared top wall and a pair of side walls, and having a downwardly extending range formed on the underside of said top wall;

where said ridge extends rearwardly to the throat of said

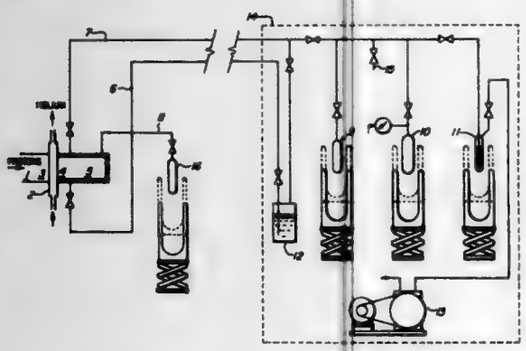
horn, and extends downwardly at least in said throat area to an extent that when said one-piece molded horn element is secured to the upper side of said mounting board, the bottom edge of said ridge in said throat area is brought into physical and electrical contact with said feed strip, and the upper surface of said mounting board forms the bottom wall of the horn.

B1 4,622,201 (1886th)

GAS-TARGET METHOD FOR THE PRODUCTION OF IODINE-123

Robert Robertson, Vancouver, and Donald C. Stuart, Ottawa, both of Canada, assignors to Nordion International Inc., Kanata, Canada

Reexamination Request No. 90/002,164, Oct. 12, 1990.
Reexamination Certificate for Patent No. 4,622,201, issued Nov. 11, 1986, Ser. No. 409,376, Aug. 18, 1982.
Claims priority, application Canada, Jun. 1, 1982, 404175
Int. Cl.[5] G21G *1/10*
U.S. Cl. 376—192



AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

Claims 1–7 are cancelled.

[1. A method of producing high-purity radioactive iodine-123 by means of the decay of 123-chain precursors thereof, said method comprising the steps of:

providing a gas-target assembly containing xenon gas enriched in the xenon-124 isotope, said gas target assembly having a deposit region on its interior surface for deposition of iodine-123;

providing at least one gas decay vessel having at least one further deposit region located therein, said gas decay vessel being remotely disposed from the gas-target assembly,

performing the following steps during a first predetermined period:

bombarding the gas within the gas-target assembly with a beam of protons of incident energy in the range of 45 MeV to 15 MeV to produce buildups of both iodine-123 and xenon-123, and depositing the iodine-123 on said deposit region in the gas-target assembly;

transferring the irradiated xenon gas from the gas-target assembly to said gas decay vessel at the termination of said first predetermined period; and, during a second predetermined period, performing the following steps:

retaining the irradiated xenon gas in said decay vessel while the xenon-123 therein decays to iodine-123 and,

washing said gas target assembly deposit region with a liquid to recover therefrom the iodine-123.]

B1 4,741,743 (1887th)

GRINDING WHEEL WITH COMBINATION OF FUSED AND SINTERED ABRASIVE GRITS

Kesh S. Narayanan, Holden; Suresh S. Vagarali, Shrewsbury, and Brian E. Swanson, Northborough, all of Mass., assignors to Norton Company, Worcester, Mass.

Reexamination Request No. 90/002,309, Mar. 28, 1991.
Reexamination Certificate for Patent No. 4,741,743, issued May 3, 1988, Ser. No. 767,204, Aug. 19, 1985.
Int. Cl.[5] B24D *3/14*
U.S. Cl. 51—309

AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

Claim 1 is determined to be patentable as amended.

Claims 2–6, dependent on an amended claim, are determined to be patentable.

1. A grinding wheel especially suitable for intermediate grinding speeds comprising *first and second* abrasive grits [bonded by] *in* an organic polymer bond [in which the abrasive grits are a mixture of] *wherein said first and second grits are respectively:*

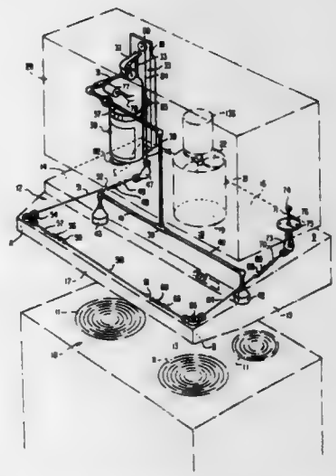
(1) cofused alumina-zirconia, containing 20 to 55% zirconia, and, (2) a sintered [aluminous] *seeded* gel *alumina* abrasive having a hardness of at least 13 on the Knoop scale, the ratio of (1) to (2) being in the range from 30 to 70 to 70 to 30, by volume.

B1 4,834,188 (1888th)

FIRE EXTINGUISHING SYSTEM FOR COOKSTOVE AND RANGES

Robert R. Silverman, Panama City, Fla., assignor to Twenty-First Century International Fire Equipment and Services Corp.

Reexamination Request No. 90/002,109, Aug. 14, 1990.
Reexamination Certificate for Patent No. 4,834,188, issued May 30, 1989, Ser. No. 172,522, Mar. 24, 1988.
Continuation-in-part of Ser. No. 27,919, Mar. 19, 1987, Pat. No. 4,773,485
Int. Cl.[5] A62C *35/00*
U.S. Cl. 169—65



AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

Claims 17 and 19 are cancelled.

Claim **1**, **9** and **10** are determined to be patentable as amended.

Claim **2–8**, **11–16** and **18**, dependent on an amended claim are determined to be patentable.

New claim **20** is added and determined to be patentable.

1. A *residental fire extinguishing* system for extinguishing stove top fires which occur on stoves that have burners, the system comprising in combination:

a hood having a top wall, first and second side walls, a front wall and a rear wall; the walls joining at first and second front corners and first and second rear corners;

nozzle means positioned within the hood and facing the stove;

fire extinguisher means connected to the nozzle means for dispensing fire suppressant material through the nozzle means;

means for operating the fire extinguisher means and means for biasing the operating means to a first position which causes the fire extinguisher to discharge the fire suppressant;

means for holding the operating means in a second position against the bias of the biasing means, wherein when the operating means is in the second position, the fire extinguishing means is prevented from discharging;

the means for holding the operating means in the second position including a cable means segmented in a plurality of sections, each section being connected to adjacent sections by fusible links;

cable support means positioned inside of the hood for training the cable means around the inside of the hood, the cable support means including a first cable support proximate the rear wall and adjacent to the first rear corner thereof, a second cable support proximate the front wall and adjacent the first front corner thereof, a third cable support proximate the front wall and adjacent the second front corner thereof and a fourth cable support proximate the rear wall and adjacent the second rear corner thereof; the cable means being free to move over at least three of the cable supports when unrestrained and being trained around the pulleys, and

means for anchoring the cable means proximate the rear wall and adjacent the second rear corner of the hood, *the anchoring means being positioned outside of the hood above the top thereof,* wherein the cable means is held in tention around the inner periphery of the hood to hold the operating means in the second position whereby when there is a fire on the stove top at least one of the fusible links separates, releasing tension on the cable and allowing the operator to move from the second position to the first position under the bias of the biasing means.

9 Claims

1. A ceiling fan assembly comprising:

(a) a ceiling fixture attachable to a ceiling structure;

(b) a shaft having one end shaped to hang vertically from the ceiling fixture;

(c) a support hub attached to the other end of [the hollow] *said* shaft;

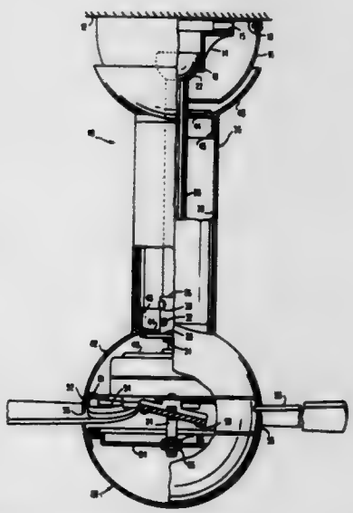
(d) a column assembly supported from the hub and including an elongated vertical hollow column surrounding and spaced from the shaft, and further including a partly spherically shaped canopy at a lower end thereof;

(e) an electric fan drive motor carried by the lower end of the shaft, the motor having a drive rotor;

(f) a fan blade support structure positioned below said canopy, the fan blade support structure including a partly spherical blade support housing having spaced fan blade mounting slot therein, the support structure including means for attaching the support structure to the motor rotor and means for attaching fan blades to said support structure;

(g) a plurality of fan blades having attachment means on the inner end of each blade for attachment to blade support structure;

(h) a partly spherical bottom cover assembly positioned below the fan blade support structure for at [lease] *least* partially covering the bottom of the motor while being spaced therefrom, the bottom cover supported from the bottom of the shaft, the combination of said canopy, said fan blade support housing and said bottom cover assembly surrounding said drive motor and providing the appearance of a ball.



8. A ceiling fan assembly comprising:

a ceiling fixture attachable to a ceiling structure;

a shaft having one end shaped to hang vertically from the ceiling fixture;

a support hub attached to the other end of said shaft;

a partly spherically shaped canopy supported by said support hub;

an electric fan drive motor carried by the lower end of the shaft, the motor having a drive rotor;

a partly spherical fan blade support structure having spaced fan blade mounting slots therein the securely retaining fan blades, and means for attaching said support structure to said drive rotor;

a plurality of fan blades each having attachment means on an inner end thereof for attachment to said blade support structure; and

a partly spherical bottom cover assembly positioned below said fan blade support structure for at least partially covering the bottom of the motor while being spaced therefrom, the bottom cover supported from the bottom of the shaft;

the combination of said canopy, said fan blade support structure

and said bottom cover assembly surrounding said drive motor and providing the appearance of a ball.

Filed Jun. 5, 1991, Ser. No. 710,554

Int. Cl.[5] A01H *5/00*

U.S. Cl. Plt.—8.1 1 Claim

1. A new and distinct variety of Miniature rose plant characterized by the following combination of characteristics:

(a) forms in abundance on a continuous basis attractive very double long lasting blossoms which are white and commonly turn yellowish toward the center when fully open,
(b) forms very vigorous vegetation with dark green and glossy foliage,
(c) exhibits a bushy growth habit,
(d) forms light green adult wood, and
(e) is not particularly affected by cryptogamic diseases;

substantially as herein shown and described.

APPARATUS FOR PROTECTION OF THE UNDER FINGER OF A QUILTER
Jean S. Adkins, Rt. 3, Box 433, Fayetteville, N.C. 28306
Filed Jan. 25, 1991, Ser. No. 646,464
Int. Cl.[5] A41D *13/00*
U.S. Cl. 2—21 **3 Claims**

1. A method of quilting comprising the steps of:
applying a protector to an underfinger of a quilter for protecting said underfinger, said protector comprising a pad of flexible vinyl material and having a rear surface completely covered by an adhesive backing for attaching said pad to said underfinger, wherein said material is thin enough to allow the quilter to feel the engagement between a tip of a needle and the material while preventing injury to the finger,
passing a needle through a quilt in a first direction and engaging the tip of said needle with said protector,
sensing engagement between said tip and said protector, and pushing on said tip with said protector and guiding said needle through said quilt in a second direction.

COMBINATION SUSPENDERS FOR USE WITH BUTTON AND BUTTONLESS TROUSERS

Cyril Lacier, Niantic, Conn., assignor to New England Accessories, Old Saybrook, Conn.

Filed Jun. 13, 1991, Ser. No. 714,496
Int. Cl.[5] A41F 1/00, 15/00, 3/00
U.S. Cl. 2—326 4 Claims

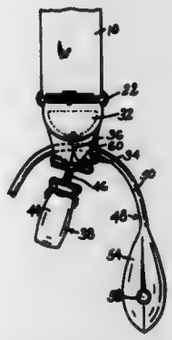
1. Combination suspenders for use with button and buttonless trousers comprising:

a plurality of suspender straps, an end of each strap connected to a clip carrier resulting in

a plurality of clip carriers, an upper end of each clip carrier being connected to a corresponding suspender strap, the lower end of each clip carrier comprising a horizontally folded flexible material permanently secured to itself to form a clip carrier channel having a substantially horizontal inner support surface, the clip carrier channel being vertically bisected into opposed halves by a slit, the slit extending upwardly perpendicular to the inner support surface on each side of the horizontal fold in the clip carrier;

a plurality of button straps, one for each clip carrier, each button strap having a central section extending through the clip carrier channel, and a buttonhole at each end, the compressed diameter of the button strap being less than the inside diameter of the channel so that the button strap may be removed from the channel; and

a plurality of clips, one for each carrier, each clip having a pair of jaws at its lower end for connecting the clip to the waistband of a pair of trousers, and a clip connector, the clip connector being T-shaped, the base of the "T" being



rigidly connected to the jaws, the body of the "T" extending vertically through the slit and the arms of the "T" extending horizontally outward into opposite halves of the clip carrier channel for support along their length by the inner support surface, the clips being removable from their corresponding clip carrier by spreading the slit to disengage the T-shaped connector.
